*Note:* Salary increases for the years to 1995-96 are grouped in two-year intervals in order to present the full 1971-72 through current year series. Consumer Price Index for all Urban Consumers (CPI-U) is from the US Bureau of Labor Statistics; change is calculated from December to December. Nominal salary is measured in current dollars. The percentage increase in real terms is the percentage increase in nominal terms adjusted for the percentage change in the CPI-U. Figures for All Faculty represent changes in salary levels from a given year to the next. Figures for Continuing Faculty represent the average salary change for faculty on staff at the same institution in both years over which the salary change is calculated. Figures for prior years have been recalculated using a consistent level of precision.
